

INSTRUMENTATION AND WORKSHOP

Introduction

Instrumentation laboratory is a section mandated to offer Laboratory equipment (calibration, analytical and test equipment) engineering services which includes installation and commissioning, repair, maintenance, modifications and decommissioning.

Our engineers are highly trained both locally and overseas to be able to tackle these scopes with some having over 20 years' experience.

Among the list of equipment we are able to work on include

- Tensile machines, Hardness testers, Abrasion machines, Impact testers etc
- Sophisticated analytical equipment e.g GCMS, AAS, HPLC,
- Calibrators e.g Temperature baths, electrical measurand standards etc
- Ovens, Fridges, Microscopes, water baths etc
- Fumehoods and biosafety cabinets
- HVAC equipment e.g refrigerators and air conditioners
